Dairy Farmers of Canada has produced a book, *Dairy Farmers—Deeply Rooted for a Strong Future*, in celebration of Canada's 150th anniversary. The book presents an overview of the emergence of the dairy sector in each province prior to confederation and its evolution into the twenty-first century. Each province is represented by one family's personal history farming the land.

"By featuring a different dairy farm from every province we have captured the unity of a sector that has fed our country in the past and that is committed to doing so for the future," said Wally Smith, President, DFC.

The Ells' Dairy Farm in Kronau, Saskatchewan, has been home to five generations of farmers. The Ell family knows little about their ancestors other than what they have been able to cobble together from their gravestones. Gord Ell knows his forebears left Germany lured by empty promises of land in Russia, before venturing further afield to settle in Saskatchewan in 1899. Upon their arrival, they established a small farm with dairy cows to feed their growing family of 13 children.

The Ells' descendants endured the Great Depression and sent their eldest sons to fight in World War II while the youngest remained on the farm to ensure its—and the family's—survival. In the 1950s the farm grew to include 100 dairy cows, the first farm to reach that size in Western Canada.

The current owners, Gord and Tiffany Ell, purchased the farm from Gord's family in 2007 and have been keen to adopt innovative technologies into their farm practices. Yet, some things have not changed on the farm, everyone in the family still helps milk the cows, a tradition they are committed to maintaining.

To read the complete story or download an electronic version of Dairy Farmers—Deeply Rooted for a Strong Future visit DFC's website (https://www.dairyfarmers.ca/news-centre/news/policy/dairy-farmers-of-canada-is-proud-to-present-the-book-dairy-farmers-deeply-rooted-for-a-strong-future).

If you did not pick up your printed copy of the book at the Spring producer meetings, please contact the SaskMilk office to request your copy!

TRACEABILITY - NLID TAGS

Farms that currently use herd management tags (tags bought from local retailers without an RFID button tag) will be required to use NLID tags effective September 1, 2017.

You can order tags by:

- 1. Calling NLID at 1-877-771-6543
- 2. Print and complete the NLID Order form and mail/fax back to:
 - o NLID
 - o Box 2065
 - o Brantford, Ontario
 - o N3T 5W5
 - o Fax: 519-756-3502

You do not need to be a Holstein Canada member or to register your animals in order to order tags. . There are a variety of tag options to choose from. Talk to the customer service representative to determine the tag that will best suit your farm.

Remember the proAction Traceability program requires that effective Sept 2017, all dairy calves must be dual tagged using NLID tags.

If you have questions or require further information contact Deb Haupstein at: deb.haupstein@saskmilk.ca 306-721-9486

Reminder!

The deadline date for Quota Transfer, Quota Exchange, Lease Applications, and 10% Transfer Limit Exemptions is the 6^{th} of each month

Your Quota Transfer, Lease, and 10% Exemption Applications must be received on or before the 6th of the month in order to be effective the 1st of the following month

Quota Exchange forms must be received in the SaskMilk office on or before the 6th of the month for that month's Exchange

Growing Forward 2 Programs Provide Opportunities for your Operation

Adapted by Kerry Lowndes, PAg, South Sask River AEGP technician From article by Sarah Sommerfeld, PAg, Saskatchewan Ministry of Agriculture

For many producers across the province, the 2016 growing season has posed many challenges. There is still much work left to do, but producers may also be focusing their attention to planning for the 2017 season. Plans may include development of a new water source, improving manure management or managing agriculture plastics. For these types of on-farm projects, producers can access cost-shared funding through the Growing Forward 2 framework of agriculture programs funded by the Federal and Provincial Governments. The Growing Forward 2 agriculture policy framework will be ending on March 31, 2018. With that date in mind, there are deadlines to be aware of with respect to the different funding programs available.

The Farm and Ranch Water Infrastructure Program (FRWIP) provides cost-shared funding to help develop secure water sources. These water sources include dugouts, large or small diameter wells, and increasing irrigated acres. FRWIP applications must be received by August 1, 2017. All claim forms for approved projects must be submitted by February 15, 2018.

The Farm Stewardship Program (FSP) provides eligible producers with financial assistance to implement beneficial management practices (BMPs). When applying to the FSP, two types of program applications exist - pre-approval or rebate. Pre-approval applications require that projects must receive prior approval before any work starts. Rebate applications do not require pre-approval, and the program application can be submitted once the project is complete. FSP pre-approval applications must be received by June 30, 2017. All claim forms for approved projects and all rebate applications must be received by January 31, 2018.

For producers wanting to improve manure management, two BMPs exist. The *Manure Storage Enhancement BMP* and *Manure Application Equipment & Technologies BMP*. The FSP will cover 30 per cent of the eligible costs up to a maximum of \$50,000 and \$30,000 respectively for implementing these BMPs. Producers looking to recycle agricultural plastics can apply for the *Plastic Grain Bag Roller BMP*. Cost-shared funding is available to cover 50 per cent of the eligible costs up to a maximum of \$5,000.

For further information on Growing Forward 2 programs or for technical assistance regarding a specific on-farm project, contact your local Regional Forage Specialist, or your Agri-Environmental Group Plan technician working within your watershed. In the South Saskatchewan River Watershed your technicians are Leah Tallis (306-291-7499) and Kerry Lowndes (306-460-4987). Info is also available from the Agriculture Knowledge Centre at 1-866-457-2377 or Program Design and Delivery Branch at 1-877-869-4008.

Growing Forward 2 is coming to a close March 31, 2018. There are some deadlines you should be aware of:

Farm Stewardship Program pre-approval applications must be submitted by **June 30, 2017.** Pre-approval and rebate claim forms must be submitted by **January 31, 2018**.

Farm and Ranch Water Infrastructure Program applications must be submitted by August 1, 2017 and claims by February 15, 2018.

For assistance contact your local Agri-Environmental Group Plan technician working in your watershed.

Thinking of starting or expanding a livestock operation?

By Bryan Gourlie, P. Eng, Provincial Livestock Development Engineer, Agriview – May 2017

Livestock producers who are considering building a new facility or expanding an existing one must consider the regulatory requirements prior to committing to their projects. Addressing environmental protection and land use requirements will help gain the local public's support, minimize development delays and eliminate the risk of having a livestock operation that is non-compliant.

Contact the local rural municipality (RM) early in the project planning stages to determine its requirements. RMs usually have a zoning bylaw that will require developers to apply for a "Discretionary Use" development permit for an intensive livestock operation. This process often goes fairly smoothly, however, in some instances the requirements of the RM or the development's proximity to local residences may result in the RM denying the application.

Municipal challenges are more likely to occur in areas with significant residential property development and where local residents have expressed nuisance and environmental concerns related to livestock operations. An RM will usually specify a separation distance between residences and both the facility and manure utilization

areas. Municipalities may also have other requirements or management constraints, such as road construction or maintenance costs and operational requirements intended to reduce nuisance issues, that will need to be addressed. Knowing the RM's requirements, adapting plans to meet them and preparing for a public process to minimize controversy will help make the RM approval process as smooth as possible.

It is also likely that an intensive livestock development will require environmental regulatory approvals to ensure that the quantity and quality of water resources are not affected by the livestock development. The Saskatchewan Water Security Agency requires developers who are planning to use surface or groundwater supplies to obtain permits. This regulatory approval ensures that there is sufficient water to supply the operation without affecting other users of the water resource.

Saskatchewan Agriculture requires intensive livestock operations to have approved waste storage and waste management plans. These plans are required under The Agricultural Operations Act and ensure that manure and animal carcasses do not contaminate surface or groundwater resources.

Obtaining regulatory approvals is vital to gaining public trust for the livestock sector.

For more Info: visit http://www.saskatchewan.ca/agriculture and search for "intensive livestock development;" or Call Saskatchewan Agriculture's Livestock Branch at 306-787-7170.

QUOTA EXCHANGE

The market-clearing price established for the May 2017 Quota Exchange was \$31,309.00

The next Quota Exchange will be held on **June 15, 2017**. All offers to sell and bids to purchase quota through the Quota Exchange must be received at the SaskMilk office by midnight, **June 6, 2017**. SaskMilk recommends that offers and bids be submitted well in advance of the deadline date to ensure adequate time for corrections, if necessary.

When making bids on the Quota Exchange, the price on offers to sell quota is the minimum price that the producer is prepared to accept for that quota. Only if the market-clearing price is equal to or greater than the producer's minimum price will that producer qualify for participation in the Exchange. Conversely, the price on offers to purchase quota is the maximum price that the producer is prepared to pay for that quota. Only if the market-clearing price is equal to or less than the producer's maximum price will that producer qualify for participation in the Exchange. The clearing price is set at the price where the smallest difference exists between the accumulated volume offered for sale and the accumulated volume bid to purchase. The results of the Quota Exchange are outlined in the following Table.

MAY 2017 QUOTA EXCHANGE RESULTS SUMMARY

Market Clearing Price per kilogram of butterfat	\$ 31,309.00

In April, Saskatchewan had a monthly CDC allocation of **879,527 kilograms** of butterfat. In the month of April, Saskatchewan production was **2,820** of butterfat **over** and cumulatively **under** by **-370,510 kilograms** of butterfat. On a percentage basis, Saskatchewan is **-3.50%*** below our CDC allocation flexibility limits based on the Continuous Quota model.

PROVINCIAL WEIGHTED AVERAGES

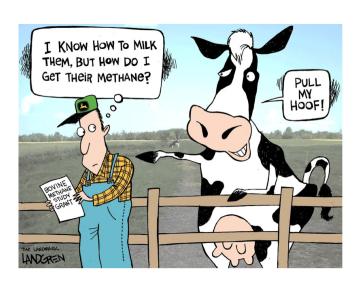

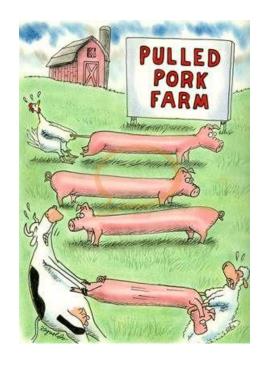

Code of Practice

5.1.3 Arranging Transport

Producers have a responsibility to ensure that the transporter they hire is trained and qualified.

RECOMMENDED BEST PRACTICES

- a. ensure only trained people load, unload and transport dairy cattle
- b. ensure all required paperwork (e.g., livestock manifests, bills of lading, emergency contact information) is completed and provided to the transporter
- c. ensure loading facilities are compatible with the type of trailer being used by the transporter d. ensure the following information is discussed and agreed upon between transporter and shipper (refer to Appendix I Livestock Transport Consignment Form):
- number of cattle to be shipped
- type of cattle (e.g., yearling heifers, mature cows, bulls, calves)
- time and point of loading
- destination
- special requirements, if any, of the animals being transported
- special protection for all cattle from cold weather, especially for calves
- e. follow these guidelines when selecting a carrier:
- if you have never used a particular transporter before, ask for a list of references that provides information on other dairy and/or livestock shippers that have used that carrier
- make sure that the carrier is experienced with your needs (e.g., short vs. long distance hauls)
- how long has the carrier been in business
- is the carrier a member of a recognized and credible trade association/organization?
- most provincial transportation ministries maintain operating and safety data on commercial carriers, sometimes referred to as a Commercial Vehicle Operating

Record or CVOR. In addition, carriers can apply to have safety ratings assessed against them (e.g., satisfactory, unsatisfactory). If they are assessed, their ratings are usually published on the provincial ministry website

- does the carrier utilize formal training methods for their drivers in the care, handling and transportation of animals?
- the carriers should be familiar with the Code of Practice for Transportation and have a copy
- the carrier should have all the requisite vehicle registrations in place (e.g., vehicle licensing, fuel tax registration, appropriate operating authorities) if the load is moving out of the province (e.g., to another province or to the United States).

If You Can't Ship It - Test It!

BSE surveillance is still important and every animal tested makes a difference.

Support your cattle industry by having your 4-D (dead, diseased, dying or downer) cattle tested for BSE.

For more information, call the Canadian Food Inspection Agency at 1-877-727-5273.

INHIBITOR TEST STATIONS

SaskMilk has established a number of inhibitor test stations around the province. Producers needing to check their bulk tanks for inhibitors can take a sample to the test station closest to their location.

The test stations have the Charm Trio test strips available for testing.

The Charm Trio test is the test that the plant uses. It tests for the following drugs:

Beta- lactam Drug	Detection Level [†] (ppb*)	US Safe Level or Tolerance / Canadian MRL (ppb*)	Sulfa Drug	Detection Level [†] (ppb*)	US Safe Level or Tolerance / Canadian MRL (ppb*)
Amoxicillin	3.1	10 / None	Sulfadimethoxine	4.7	10 / 10∞
Ampicillin	7.7	10 / 10	Sulfamethazine	7.7	10 / 10∞
Ceftiofur and Metabolites^	53	100 / 100	Tetracycline Drug	Detection Level [†] (ppb*)	US Safe Level/Tolerance / Canadian MRL (ppb*)
Cephapirin	14	20 / 20	Chlortetracycline	54	300 / 100
Cloxacillin	7.4	10 / None	Oxytetracycline	66	300 / 100
Penicillin G	2.2	5 / 6 ^{&}	Tetracycline	21	300 / 100

[†] Positive at least 90% of the time with 95% confidence.

Test stations are located at the following locations:

- 1. Swift Current, SK Agrifoods truck bay 675 Cheadle Street West
 Office 306-773-1097 or Rodger Ruf 306-741-3261
- 2. Harris, SK Cairnside Farm Wes Cairns 306-656-4807
- 3. Star City, SK Star City Colony Reuben Tschetter 306-921-9381
- 4. Grenfell, SK Jim Ross 306-697-2232
- 5. Yorkton, SK Ford Dairy Farms Inc. Bud and Margaret Ford 306-782-7240
- 6. Saskatoon, SK Agrifoods Truck Bay east of the Saputo plant receiving bay lead hand Mike V. or Mike K. 306-664-0202 after hours: 306-668-8135

Charm tests strips and Charm testers are now available for purchase through SaskMilk. Agrifoods is now carrying SNAP test kits for tetracyclines as well as beta lactams.

For further information you can contact: Deb Haupstein 306-721-9486

^{*} parts per billion or ng/mL

[^] Ceftiofur parent drug sensitivity is approximately 1/2 that reported in the table.

[&] Canadian MRL for penicillin G is 0.01 IU/ml, equivalent to 6 ppb.

[∞] Canadian MRL for sulfa drugs are singly or in combination with other MRL listed sulfonamides.

QUOTA LISTING or CLASSIFIED AD SERVICE

SaskMilk offers a free quota listing service as part of its Newsletter. Anyone wishing to sell or purchase quota and/or cows or miscellaneous dairy equipment is welcome to contact the SaskMilk office at (306) 949-6999. All prices and negotiations will be independent of SaskMilk. Please note that ads will be posted in two issues and will then be removed unless SaskMilk is notified otherwise.
