Responding to Supply Management Myths...

With Canadian dairy farmers, yet again, caught in the cross hairs of trade negotiations, it is important to understand how to combat the misinformation that rapidly spreads through the news, radio, and Facebook comment sections. As frustrating as it is, there is value in addressing these topics in an effort to support supply management and the success of Canada's system. We've compiled some of the most common myths surrounding supply management with some rebuttals.

1) **“Canadian families pay hundreds of dollars more every year for dairy, eggs, and poultry products”**

- Retailers set the retail price for milk, supply management only sets the farmgate price.
- In Canada, retail prices for milk are in line with those in other jurisdictions. In 2014, consumers paid an average of \$1.47/litre from fresh milk in Canada, compared with \$1.83 in New Zealand, \$1.81 in France, \$1.15 in the U.S, \$1.19 in Germany, and \$2.35 in China.
- Milk labelled “rBST-free” in the United States is actually higher per litre than milk in Canada (where all milk is free of rBST free) at \$1.64.

- Additionally, since there are no subsidies, Canadian consumers pay once for their milk at the grocery store.

2) **“Supply management doesn't adapt to changes in demand and it discourages innovation and productivity”**

- Over the years, Canadian dairy farmers have invested millions into their farms, and into numerous research projects. These investments have contributed to milk yield increases of more than 130% - without the use of the growth hormone rBST like in some other jurisdictions, this has outpaced the US (+116%), UK (+91%), NZ (+49%).
- Recently, the Canadian dairy industry released proAction, an on-farm sustainability project focused on further innovation and improvement.

- 3) **“Supply Management prevents competition from foreign imports”**
 - An estimated 8%-10% of the Canadian dairy market is already open to imports, which does not take into account the additional 1.5-2% of access for European cheese granted in CETA, or the additional 3.25-4% of access granted by the TPP.
 - Supply management allows our farmers to receive a fair return from the domestic market and, in order to limit our production to market needs, we need to know the quantity of foreign products being imported so we can plan our production.
- 4) **“The export market represents better opportunities for Supply Managed farmers”**
 - Dairy is not a major export commodity, only 9% of all global milk production is exported
 - The relatively small global export market is already saturated with established big players from countries such as the U.S and New Zealand who are at a competitive advantage due to lower costs of production and the generous government subsidies they receive
- 5) **The market price of quota is a barrier for the growth of farms and for those who might want to become farmers.**
 - No matter the sector, starting a business from scratch is extremely difficult for a young person who is not taking over the family business. The profitability and stability of supply-managed sectors are success factors in establishing the next generation.
 - Buying a business in a developed market in any sector comes not only with a cost for the assets, but also for the business’s client base, and other factors. Buying quota is buying a share of the market. Most dairy farms are passed down within the family or to a non-relative at a cost, including the right to produce, which will allow the next generation to earn a living and grow their businesses.
 - All provinces have new entrant assistance programs for new dairy farms that involve long-term quota loans or grants.

If you have more questions regarding trade or are unsure of how to respond to a claim not listed here, call Joy at (305) 721-9482.

2018 Fall Producer Meetings

Dates and Locations

NOTE:

Registration begins at 9:30 a.m.

Meetings begin at 10:00 a.m.

October 15th – Swift Current
F.O.E. Eagles
1910 S Service Rd W
Swift Current, SK

October 16th – Warman
Legends Centre
701 Centennial Blvd. N.
Warman, SK

October 17th – Fort Qu’Appelle
Royal Canadian Legion
197 Company Avenue
Fort Qu'Appelle, SK

SaskMilk in the Community...

From DFC this month...

Introducing MissFresh Partnership

With the growing popularity of online food subscription services across Canada, Dairy Farmers of Canada (DFC) is excited to announce a partnership with MissFresh, a Canadian company that strives to help people lead a healthier lifestyle by making eating healthy at home easy and accessible to everyone. The service is perfect for those who don't have much time to spare in their busy lifestyles for meal planning and preparation but appreciate the health benefits associated with cooking nutritious healthy meals at home and choosing smarter food options, to which farmers and consumers alike can relate.

The partnership launched August 12, providing recipe options to MissFresh customers made with Canadian dairy products. This includes recipes like aged cheddar, pancetta, apple and arugula pizza and shepherd's pie au gratin. The

recipes offered change on a weekly basis providing for a variety of choices and the opportunity to feature a number of Canadian dairy products. In addition, the 100% Canadian dairy certification mark of origin is highlighted on the MissFresh website promoting the partnership and is attached to each recipe featuring Canadian dairy products.

DFC President Pierre Lampron is enthusiastic about the partnership saying, "Canadian dairy is a highly nutritious product and I am pleased to see more Canadian dairy enter the homes of Canadians as they explore ready to prepare meal kits as a healthy and convenient option."

Ready to try MissFresh for yourself? **Get cooking with \$80 off your first 2 orders**

SaskMilk Upcoming Promotional Events*

(*we are participating in or have sponsored)

September 5 - 19	YX Eats – Saskatoon
September 12	FCC Food Influencer RD Tour, Partnership with DFC - Saskatoon
September 15	Cultural Connections 'India Night' - Regina
September 21 – 22	Premiere Wine Show – Saskatoon
September 27 & 28	Saskatchewan Home Economics Teachers Association (SHETA) & Association of Saskatchewan Home Economists (ASHE)
October 5	Regina Teachers Conference - Regina
November 19 – 24	Agribition – Regina

Reminder!

The deadline date for Quota Transfer, Quota Exchange, and 10% Transfer Limit Exemptions is the 6th of each month

Your Quota Transfer, and 10% Exemption Applications must be received on or before the 6th of the month in order to be effective the 1st of the following month

Quota Exchange forms must be received in the SaskMilk office on or before the 6th of the month for that month's Exchange

Code of Practice

2.2 Nutrition and Feed Management

The nutritional requirements of the cow can be met using a variety of feed components. Cows can be fed a total mixed ration (TMR) or alternatively a component based ration. Correct feed management is necessary to ensure good health and welfare. Cows are motivated to perform the same activity at the same time (e.g., feed, rest, ruminate). Cows also prefer to eat during daylight hours. Increased feeding frequency (at least twice per day) has been found to reduce the amount of total mixed ration (TMR) sorting that occurs and allows subordinate cows to access feed more often.

Feed management programs that consider such behavioral needs are likely to reduce stress and aggressive behaviors within a herd, and have a positive impact on herd health and productivity (27).

Dairy cattle experience a number of transition periods (unweaned to weaned, dry to fresh) that present nutritional challenges for producers to meet. Feeding practices have a major impact on the overall health and welfare of cattle. Cattle that are not fed adequately will be hungry, and are also more likely to have reduced immune function (31).

REQUIREMENTS

Cows must receive a ration that is adequate for maintaining health and vigor.

RECOMMENDED BEST PRACTICES

- a. ensure the composition of diets reflects production level, reproductive stage, body size, housing and weather conditions
- b. test nutrient content of feed ingredients used
- c. ensure all rations have been balanced and that all feed components used in the ration are of good quality and free of spoilage
- d. Provide fresh feed to the cow daily when she is in the barn, except when fasting is required for medical reasons
- e. minimize factors that create stress or aggressive behaviors within a herd
- f. provide adequate linear feed bunk space (e.g., 24in, 60cm, per cow)
- g. keep a consistent feeding schedule
- h. provide adequate bunk access time
- i. ensure continuous access by pushing up feed in the bunk.

QUOTA EXCHANGE

The market-clearing price established for the September 2018 Quota Exchange was **\$31,818.00**.

The next Quota Exchange will be held on **October 15, 2018**. All offers to sell and bids to purchase quota through the Quota Exchange must be received at the SaskMilk office by midnight, **October 6, 2018**. SaskMilk recommends that offers and bids be submitted well in advance of the deadline date to ensure adequate time for corrections, if necessary.

When making bids on the Quota Exchange, the price on offers to sell quota is the minimum price that the producer is prepared to accept for that quota. Only if the market-clearing price is equal to or greater than the producer's minimum price will that producer qualify for participation in the Exchange. Conversely, the price on offers to purchase quota is the maximum price that the producer is prepared to pay for that quota. Only if the market-clearing price is equal to or less than the producer's maximum price will that producer qualify for participation in the Exchange. The clearing price is set at the price where the smallest difference exists between the accumulated volume offered for sale and the accumulated volume bid to purchase. The results of the Quota Exchange are outlined in the following Table.

SEPTEMBER 2018 QUOTA EXCHANGE RESULTS SUMMARY

Market Clearing Price per kilogram of butterfat	\$ 31,818.00
Daily Kilograms offered to Purchase	59.00
Kilograms offered to Sell	67.20

PROVINCIAL WEIGHTED AVERAGES

INHIBITOR TEST STATIONS

SaskMilk has established a number of inhibitor test stations around the province. Producers needing to check their bulk tanks for inhibitors can take a sample to the test station closest to their location.

The test stations have the Charm Trio test strips available for testing. The Charm Trio test is the test that the plant uses. It tests for the following drugs:

Beta-lactam Drug	Detection Level [†] (ppb*)	US Safe Level or Tolerance / Canadian MRL (ppb*)	Sulfa Drug	Detection Level [†] (ppb*)	US Safe Level or Tolerance / Canadian MRL (ppb*)
Amoxicillin	3.1	10 / None	Sulfadimethoxine	4.7	10 / 10 [∞]
Ampicillin	7.7	10 / 10	Sulfamethazine	7.7	10 / 10 [∞]
Ceftiofur and Metabolites [^]	53	100 / 100	Tetracycline Drug	Detection Level [†] (ppb*)	US Safe Level/Tolerance / Canadian MRL (ppb*)
Cephapirin	14	20 / 20	Chlortetracycline	54	300 / 100
Cloxacillin	7.4	10 / None	Oxytetracycline	66	300 / 100
Penicillin G	2.2	5 / 6 ^{&}	Tetracycline	21	300 / 100

[†] Positive at least 90% of the time with 95% confidence.

* parts per billion or ng/mL

[^] Ceftiofur parent drug sensitivity is approximately 1/2 that reported in the table.

[&] Canadian MRL for penicillin G is 0.01 IU/ml, equivalent to 6 ppb.

[∞] Canadian MRL for sulfa drugs are singly or in combination with other MRL listed sulfonamides.

Test stations are located at the following locations:

1. Swift Current, SK - Agrifoods truck bay - 675 Cheadle Street West
Office 306-773-1097 or Rodger Ruf 306-741-3261
2. Star City, SK - Star City Colony - Reuben Tschetter 306-921-9381
3. Grenfell, SK - Jim Ross 306-697-2232
4. Yorkton, SK - Ford Dairy Farms Inc. - Bud and Margaret Ford 306-782-7240
5. Saskatoon, SK – Agrifoods Truck Bay - east of the Saputo plant receiving bay
lead hand – Mike V. or Mike K. 306-664-0202 after hours: 306-668-8135

Charm tests strips and Charm testers are now available for purchase through SaskMilk. Agrifoods is now carrying SNAP test kits for tetracyclines as well as beta lactams.

For further information you can contact: Deb Haupstein 306-721-9486

If You Can't Ship It - Test It!

BSE surveillance is still important and every animal tested makes a difference.

Support your cattle industry by having your 4-D (dead, diseased, dying or downer) cattle tested for BSE.

For more information, call the Canadian Food Inspection Agency at 1-877-727-5273.

HOOF TRIMMING CLINIC AND HOOF HEALTH SEMINAR

Location: Saskatoon Area (Warman)
Date: November 6 & 7, 2018

Location: Swift Current Area
Date: November 8 & 9, 2018

The Western Canadian Certified Hoof Trimmers Association (WCCHTA) together with Nutrisource Inc. will deliver a 2-day hoof trimming workshop for farmers and farm personnel who are interested in learning how to trim. This will be a theory and practical workshop, where you will learn the basics of functional and corrective hoof trimming (based on 5-Step Dutch method) and get to practice trimming cadaver feet. There will also be a half day seminar on day 2 on how to improve hoof health on farm. The course will run from 8:30 am – 4pm daily with the following choice of workshop locations:

Tuesday, November 6 to Wednesday, November 7 in Warman, near Saskatoon (501 Neufeld Street, Bay 1, Warman) from 8:30 am – 4pm daily.

Thursday, November 8 to Friday, November 9 south west of Swift Current from 8:30 am – 4pm daily.

Lunch, snacks and drinks will be provided, as well as all trimming equipment and materials. The cost of the workshop will be \$750 (+GST) per person. There will be 2 certified instructors* and each workshop is open to a maximum of 12 people. For more details on the workshop and seminar please **contact Casey Jacobs** (casey.jacobs@nutrisource.ca; 403-477-6710).

*The WCCHTA instructors for the course are all full-time professional hoof trimmers certified as trainers by the Dairy Training Center in Oenkerk, The Netherlands.

ENVIRONMENTAL FARM PLANS (EFPs) WORKSHOPS

By the end of 2018 all dairy producers in Saskatchewan are required to have an up-to-date Environmental Farm Plan (EFP) for their operation. In the past, the EFP program was delivered in a workshop format, however Saskatchewan Ministry of Agriculture has changed to an online portal available at www.saskatchewan.ca/EFP.

To make it easier to for producers to complete their plans by the end of 2018, SaskMilk organized a number of one-day workshops that covered how to use the portal and walked through an example dairy farm. The attendance has been good at these workshops and producers are encouraged to continue to work on completing their EFP's.

If you have questions or issues as you work on your EFP you can call Leah at 306-291-7499 or Teddi at 306-291-8045 or email them at dairyefp@gmail.com

Dates have not yet been determined but more workshops will be scheduled for late fall.

QUOTA LISTING or CLASSIFIED AD SERVICE

SaskMilk offers a free quota listing service as part of its Newsletter. Anyone wishing to sell or purchase quota and/or cows or miscellaneous dairy equipment is welcome to contact the SaskMilk office at (306) 949-6999. All prices and negotiations will be independent of SaskMilk. **Please note that ads will be posted in two issues and will then be removed unless SaskMilk is notified otherwise.**
