From the Chair's Desk

I am pleased to be able to take this time to address our Saskatchewan producers.

2020 will be a year that none of us will forget. The challenges we faced this past year go far beyond our business. A pandemic that impacted every person in some way will have a mark on us for a long time. However, at a time when consumer demands were in flux, we were able to adjust and adapt at every turn. From those of us that had to make hard decisions regarding lowering production at times, thank you. The response from producers in Western Canada, and particularly in Saskatchewan, was tremendous. We lowered production when needed and now for the last few months were able to capture a strong portion of the incentive days that have been issued to us. With collaboration from our Western Milk Pool partners we were able to manage our way through the supply and demand situation that we were faced with.

I would like to take this opportunity to welcome our new board members that were elected in fall: Jessica Lovich, Gord Ell and Brian Lindenbach. I look forward to working with you and the rest of the board for this coming year.

I remind you to be heard and participate when you can. During Fall Producer Meetings and the Annual General meeting, there were many questions asked and comments given. As a board we appreciate this. It is important that this continues even when we are not face to face. It helps us as a board, to gather information and opinions that come into play as we create or adjust policy throughout the year. As you know we are having a close look at our quota policy. Many of you completed a questionnaire and those responses will help the board with considering changes with that policy. This particular policy review will take some time as it is a major piece with many components. Throughout the year we will look at various policies and review them carefully and assess them to decide if there is any need for change. The quota policy is only one of them.

I do hope that 2021 is a healthy and fruitful year for everyone. It is a goal of the board to have meaningful relationship with our members. I encourage you to call me or any one of our directors to have a conversation.

Matt Flaman

SaskMilk Updates

Progressive Penalty System

Effective August 2021, SaskMilk will be switching from an averaging quality penalty system to a progressive penalty system for quality violations.

Producers are now receiving a monthly summary of their quality results showing how the progressive penalty system would be applied to their current quality results. The summaries have been calculated starting August 2020 the running to July 31, 2021. The goal of the summary is to have producers become familiar with and understand how the Progressive penalty system will be applied to quality results.

If you have any comments or suggestions regarding the Progressive Penalty system you can contact one of your SaskMilk Board members or Deb Haupstein deb.haupstein@saskmilk.ca or Emily Morabito emily.morabito@saskmilk.ca.

Requirement for on Farm Bulk Tank Holding Capacity

As producers are aware, there have been some severe storms this winter and milk pickups have been affected.

The following is excerpt from Board **Order No. 36/18** *The Milk Marketing Plan Regulations-Facility Standards* that details the requirements for on farm storage capacity:

20 Unless otherwise approved by the Board, a licensed producer:

(b) shall have a capacity sufficient to hold and cool milk produced in three consecutive days at peak production.

Compensation is not provided for milk dumped before the three day limit.

UPDATING YOUR CONTACT INFORMATION

Up to date contact information can help disseminate information quicker in case of emergencies or urgent matters.

The SaskMilk Producer Portal allows you modify your contact information to ensure that your information is accurate. See instructions below:

1. From the Contact menu item select Contacts
2. Click the view button () beside the contact needing to be updated
3. Click the blue Edit button (bottom right)
4. Update the record
5. Hit save

Save the Date

Tenth Annual Dairy Info Day (VIRTUAL MEETING)

Thursday, January 21, 2021 on Zoom

9:00 Welcome and opening comments by Chair of the SaskMilk Board (Matthew Flaman), and Head of the Department of Animal and Poultry Science (Bob Tyler)

Dairy Advisory Board and Rayner Dairy Research and Teaching Facility

9:15 Report from Dairy Advisory Board

9:30 Report on operations of the Rayner Research and Teaching Facility – Jay Olyniuk, Facility Manager

Presentations

9:50 Producer Panel Presentations –Producer perspectives on cow comfort

Speakers:

Jay Olyniuk, Facility Manager (Rayner Research and Teaching Facility, Saskatoon)

Merlis Wiebe, Dairy producer (Marfay Farms, Osler)

Guest Speaker- Dr. Nigel Cook, University of Wisconsin

10:50 Producer panel for discussion and questions (LIVE)

11:20 Update on NSERC calf research (specific title to be provided) – Anne Laarman, Department of Agriculture, Food and Nutritional Science, University of Alberta

11:35 Comparison of bedded mattresses to deep-bedded stalls with shavings- Tara Sweetnam, University of Saskatchewan Undergraduate Student

11:45 A novel therapeutic treatment for mastitis - Meena Sakharkar and Jian Yang, College of Pharmacy and Nutrition, University of Saskatchewan

11:55 Impact of processing methods of prairie oats in comparison with barley grain on milk production in dairy cows - Maria E. Rodriguez-Espinosa, University of Saskatchewan PhD Student

12:05 Closing remarks

To register, contact info@saskmilk.ca by **January 20**.

IN MEMORIAM

Robert "Bob" Crowe
October 29, 1954 ~ December 23, 2020

Robert (Bob) Crowe passed away unexpectedly December 23, 2020.

Bobby was raised on a dairy farm in Gilbert Plains but soon took flight to Winnipeg to start one of his many adventurespumping gas, changing tires and delivering fuel oil. Then back to Dauphin to sell vehicles and be a parts manager. Enjoyed all the great times hanging out with the Hydes at their cottage, playing volleyball, frisbee and waterskiing by day and cards late into the night.

Again back to Winnipeg to manage a gas station /car wash. Dauphin called him back to build a greenhouse/garden center/ florist shop. In his spare time he became a correctional officer. His love of dairy cattle, their caregivers and their families took him across Canada and down to Madison USA.

Bob loved every show, sale and exhibition and all the friends that he made along the way. He wore many hats; poet, mentor, barn boss, bus driver, story and joke teller and our own Mr. Fixit. Bob could imitate his good friends Ray Brown and Norm Atkins so well. Bob was the glue that kept our families together.

Survived by wife Marilyn, daughters Erin (Brian) Mckenzie, and Brett (Jamie) Hogue and his pride and joy; grandsons, Finn and Kade. Sisters; Heather (Rod) Hart of Carmen and Noreen (Les) Chudyk of Winnipeg ; sister-in-laws Kathy Crowe of Gilbert Plains and Wanda (Lindsay) Harris of Stonewall. 3 brother-in-laws; Kelly (Heather) Secord of Winnipeg, Kim (Susie) Secord of Dauphin, and Kirk of Dauphin. 2 sister-in-laws; Wanda (Owen) Connolly of Dauphin and Susan (Ed) MacQuarrie of Dauphin and cousin/almost brother Neil Hyde, along with extended families and friends. His dairy family, his greenhouse family, his corrections family, his hockey family ...he loved and cherished you all.

Bob was predeceased by his parents Jim and Birda Crowe and brothers Bill and Dean, niece Denise, and sister in law Shawna Secord and in-laws Freda and Rollie Secord.

He will be fondly remembered for his endless jokes and welcoming smile....but oh my, Crowbar could snore.

In lieu of a service, go to that cattle show, sale or event... share a story, tell a joke and make more great memories. That was his wish.

If friends desire please donate to the Dauphin Friendship Center Hot Lunch Program or your local Food Bank.

Bob was a familiar face to many within the dairy industry and particularly to anyone who attended the milking demonstrations at Agribition. He was involved with the milking display and demonstrations from the very beginning and with his ready wit and dairy knowledge he made them one of the most popular activities for teachers and students attending Agribition. There was always a waiting list of schools who wanted to attend the milking demos and teachers made a point of telling us that the milking demonstrations were a "must see" activity for them and their classes when they came to Agribition.

It is hard to imagine the Agribition milking display without Bob.

He will be missed.

- Deb Hauptstein

Western Canadian Dairy Seminar

Registration is now OPEN for the 2021 Western Canadian Dairy Seminar

Join us online, March 8 to 12, 2021 for the 'Virtual. Dairy. Reality' Western Canadian Dairy Seminar (WCDS). Spread out over 5 days (2-3 hours a day), the virtual (online) version of WCDS 2021 gives you the opportunity to hear about recent research and new technology from speakers presenting on a range of topics, including calf health, nutrition, and reproduction.

There will also be virtual tours of 3 progressive dairy farms across Western Canada, a live student research presentation competition (delegates can vote for their favorite presentation) and, the always popular, producer panel. The virtual trade show area gives you the chance to connect with our industry sponsors as well as discuss the latest dairy-related research in the virtual research poster display section.

View the program at www.wcds.ca/program

The 2021 program and the event itself has something for everyone.

Registration is just \$50 and includes all presentations, the farm tours as well as access to the virtual trade show area. All producers who register before February 8, will also be entered in a draw to win 1 of 100 WCDS Event Kits!

Register today at www.wcds.ca/registration

We look forward to connecting with you online

QUOTA EXCHANGE

The market-clearing price established for the January 2021 Quota Exchange was **\$38,500.00**.

The next Quota Exchange will be held on **February 15, 2021**. All offers to sell and bids to purchase quota through the Quota Exchange must be submitted by midnight, **February 6, 2021**. SaskMilk recommends that offers and bids be submitted well in advance of the deadline date to ensure adequate time for corrections, if necessary.

When making bids on the Quota Exchange, the price on offers to sell quota is the minimum price that the producer is prepared to accept for that quota. Only if the market-clearing price is equal to or greater than the producer's minimum price will that producer qualify for participation in the Exchange. Conversely, the price on offers to purchase quota is the maximum price that the producer is prepared to pay for that quota. Only if the market-clearing price is equal to or less than the producer's maximum price will that producer qualify for participation in the Exchange. The clearing price is set at the price where the smallest difference exists between the accumulated volume offered for sale and the accumulated volume bid to purchase. The results of the Quota Exchange are outlined in the following Table.

JANUARY 2021 QUOTA EXCHANGE RESULTS

Market Clearing Price per kilogram of butterfat	\$ 38,500.00

SK Milk Production SK Position

INHIBITOR TEST STATIONS

SaskMilk has established a number of inhibitor test stations around the province. Producers needing to check their bulk tanks for inhibitors can take a sample to the test station closest to their location.

The test stations have the Charm Trio test strips available for testing. The Charm Trio test is the test that the plant uses. It tests for the following drugs:

Beta-lactam Drug	Detection Level† (ppb*)	US Safe Level or Tolerance / Canadian MRL (ppb*)	Sulfa Drug	Detection Level† (ppb*)	US Safe Level or Tolerance / Canadian MRL (ppb*)
Amoxicillin	3.1	10 / None	Sulfadimethoxine	4.7	10 / 10 [∞]
Ampicillin	7.7	10 / 10	Sulfamethazine	7.7	10 / 10 [∞]
Ceftiofur and Metabolites [^]	53	100 / 100	Tetracycline Drug	Detection Level† (ppb*)	US Safe Level/Tolerance / Canadian MRL (ppb*)
Cephapirin	14	20 / 20	Chlortetracycline	54	300 / 100
Cloxacillin	7.4	10 / None	Oxytetracycline	66	300 / 100
Penicillin G	2.2	5 / 6 ^{&}	Tetracycline	21	300 / 100

† Positive at least 90% of the time with 95% confidence.

* parts per billion or ng/mL

[^] Ceftiofur parent drug sensitivity is approximately 1/2 that reported in the table.

[&] Canadian MRL for penicillin G is 0.01 IU/ml, equivalent to 6 ppb.

[∞] Canadian MRL for sulfa drugs are singly or in combination with other MRL listed sulfonamides.

Test stations are located at the following locations:

1. Swift Current, SK - Agrifoods truck bay - 675 Cheadle Street West Office 306-773-1097 or Rodger Ruf 306-741-3261
2. Star City, SK - Star City Colony - Reuben Tschetter 306-921-9381
3. Grenfell, SK - Jim Ross 306-697-2232
4. Yorkton, SK - Ford Dairy Farms Inc. - Bud and Margaret Ford 306-782-7240
5. Saskatoon, SK – Agrifoods Truck Bay - east of the Saputo plant receiving bay
lead hand – Mike V. or Mike K. 306-664-0202 after hours: 306-668-8135

Charm tests strips and Charm testers are now available for purchase through SaskMilk. Agrifoods is now carrying SNAP test kits for tetracyclines as well as beta lactams. For further information you can contact: Deb Haupstein 306-721-9486

Code of Practice

5.1.1 Fitness for Transport

An effective herd health management program should minimize the number of compromised animals that need to be transported.

Compromised animals are animals with a reduced capacity to withstand the stress of transportation, due to injury, fatigue, infirmity, poor health, distress, very young or old age, impending birth, or any other cause. By following sound principles of herd health management most cases of compromised animals can be avoided (refer to Section 3.4).

Never transport an animal unless you are sure it is healthy enough to handle the stress of the entire expected trip (including intermediate stops). **If you are not sure an animal is fit for the trip**, contact your herd veterinarian.

If you take steps to prevent additional injury or undue suffering, you may move some compromised animals using special provisions such as:

- transport for immediate slaughter directly to the nearest appropriate slaughter establishment, keeping transport time to a minimum
- shipping in a separate compartment with ample bedding.

Please note that your transporter may charge an additional fee to provide this additional care.

On the advice of a licensed veterinarian, you can transport a non-ambulatory animal to a veterinary clinic for treatment or diagnosis. If this is the case, you should request written authorization from a licensed veterinarian and provide a copy of it to your transporter.

Some animals are completely unfit for transport. In this case, you must delay transport until the animal is fit for the trip if it is humane to do so (for example, when an animal has recently given birth). If delaying transport could result in undue suffering, and if the animal is unlikely to recover on its own, the animal must either be treated or euthanized on site (refer to Section 6 - Euthanasia).

Non-ambulatory animals, animals with a low body condition score indicating emaciation or weakness (see Appendix E - Body Condition Scoring Chart), or animals with severe lameness, would endure unnecessary suffering during the transportation process and must not be transported, except for veterinary treatment or diagnosis, on the advice of a veterinarian. This is true of any condition which would subject the animal to unnecessary suffering due to transport.

"Non-ambulatory" means unable to stand without assistance or to move without being dragged or carried, regardless of size or age. Non-ambulatory animals are also called "downers."

Producers have a primary responsibility for determining if an animal is fit for the expected duration of the trip. While the carrier or the driver should not be relied upon to determine whether an animal is compromised or unfit for transport, they have the right and responsibility to refuse to load an animal that they recognize as unfit.

REQUIREMENTS

- *Every animal must be assessed before being transported - Refer to Appendices G - Guidelines for Dealing with Compromised Animals, and H - Should this Animal be Loaded?*
- *Non-ambulatory animals, animals with a body condition score indicating emaciation or weakness, or animals with severe lameness must not be transported, except for veterinary treatment or diagnosis.*
- *Do not transport animals that are likely to give birth during the intended journey.*
- *Do not transport cattle that require hobbling in order to walk.*
-

RECOMMENDED BEST PRACTICES

- a. refer to Appendix G - Guidelines for Dealing with Compromised Cattle, for information on the categories of lameness
- b. identify less severe conditions early so that animals can be treated or shipped, as appropriate, before a condition worsens
- c. consult with the herd veterinarian in making decisions about cull animals. Evaluate fitness for transport in the context of each trip including relevant factors, such as the anticipated total trip duration from farm to final destination and prevailing weather conditions (e.g., compromised animals are more likely to suffer adverse effects of hot humid weather). For example, an animal that is fit for a short journey direct to an abattoir may not be fit for marketing through an auction
- d. refer to Appendix H - Should This Animal Be Loaded?, for further guidance on determining fitness for transport
- e. further guidance on determining fitness for transport
- e. compromised animals should be shipped directly to an abattoir, not through auction markets.

**QUOTA LISTING or CLASSIFIED AD
SERVICE**

SaskMilk offers a free quota listing service as part of its Newsletter. Anyone wishing to sell or purchase quota, cows or miscellaneous dairy equipment is welcome to contact the SaskMilk office at (306) 949-6999. All prices and negotiations will be independent of SaskMilk. **Please note that ads will be posted in two issues and will then be removed unless SaskMilk is notified otherwise.**

Reminder!

The deadline date for Quota Transfer, Quota Exchange, and 10% Transfer Limit Exemptions is the 6th of each month

Your Quota Transfer, and 10% Exemption Applications must be received on or before the 6th of the month in order to be effective the 1st of the following month

Quota Exchange forms must be received in the SaskMilk office on or before the 6th of the month for that month's Exchange
