2022 Federal Budget

resulting from the Canada-European Union Economic and Trade Agreement and the Comprehensive and Progressive Agreement for Trans-Pacific Partnership. Processors of dairy, poultry, and eggs have also received \$392.5 million in compensation. In the 2022 fall economic and fiscal update, the federal government plans to announce full and fair compensation for supply managed sectors, including dairy.

Sustainable Agriculture to Fight Climate Change

While agriculture plays an essential role in Canada's economy, the industry represents roughly 10% of the country's greenhouse gas emissions. Budget 2022 includes proposals of \$329.4 million over six years to triple the Agricultural Clean Energy Program, \$469.5 million over six years to Agriculture and Agri-Food Canada to expand the Agriculture Climate Solutions Programs' On-Farm Climate Action Fund, and \$150 million to support an agricultural landscape program focused on carbon sequestering and adaptation.

National School Food Policy

Working alongside provinces, the Federal Government will develop a National School Food Policy and examine how more Canadian children can access nutritious food at school. Dairy Farmers of Canada and SaskMilk will work with the government to ensure nutritious Canadian dairy products are included in this programming.

Taking More Action to Eliminate Plastic Waste

Budget 2022 proposes \$183.1 million over five years to a variety of environmentally focused organizations to develop and implement regulatory measures and conduct scientific research to reduce plastic waste and increase plastic circularity in Canada.

SaskMilk will continue to work closely with Dairy Farmers of Canada to make sure dairy producers are considered in these initiatives and benefit from them as they become available. To find out more information about the 2022 Federal Budget, click [here](#).

On April 7th, the Deputy Prime Minister and Finance Minister Chrystia Freeland tabled the 2022 Federal Budget. The budget focuses on growing the economy through broad initiatives like affordable housing, financial institution taxes, and small business deductions. In addition, there were several initiatives announced that impact Canadian dairy producers.

Full and Fair Compensation for Supply Managed Sectors

Since 2016, the federal government has provided \$2.7 billion in compensation for farmers

Mental Health Spotlight

Lend An Ear: How To Be A Good Listener For Someone With A Mental Health Issue

By Lesley Kelly, Farmer and Co-Founder of the Do More Agriculture Foundation

Do you know that we possess one of the most effective tools to help someone when they are experiencing a mental health crisis?

Listening.

We hear a lot about active listening – listening and responding to another person to improve mutual understanding. It can be a difficult skill to learn and master, as it requires us to be more present, attentive, engaged, open and flexible. We spend many years being taught how to speak, read and write but we're never formally taught how to listen, which is the skill we use the most. It's not surprising then, that we tend to find listening quite difficult or we may overestimate our ability to do it well.

WHAT PREVENTS US FROM LISTENING EFFECTIVELY?

- 🐾 Having other things on our mind causing us to zone in and out
- 🐾 Trying to think ahead to what we will say next, possibly missing much of what the other person is saying
- 🐾 Feeling the desire to fix problems and come up with solutions
- 🐾 Feeling as though we don't have enough time, causing impatience
- 🐾 Having our own agenda, so leading the conversation to meet our needs
- 🐾 Our frame of reference, which affects how we perceive others and causes us to make judgments rather than listening actively

For situations when someone is experiencing symptoms of a mental health crisis, there is a kind of listening, other than active listening that can be quite effective: empathetic listening. For a person experiencing a mental health problem, having an empathetic listener can be calming and reassuring – even healing.

Empathy, unlike sympathy, does not mean we agree with the other person or see things from the same point of view. Instead, it requires taking a moment to step outside of our normal patterns of thinking and feeling to imagine what it feels like to be the person in front of us.

Even if you're totally comfortable talking about your mental health, it can be a really intimidating and scary process for others – trying to open up so they can share some very personal stuff isn't an easy thing to do. Especially when they're feeling vulnerable and worried about judgment.

If someone is ready to talk, that means they're also looking for support. And if they're chosen you to open up to, here's your chance to be the supportive ear they're looking for.

Be patient and engaged

It can be intimidating for someone to open up to you, so it's important to remember to let them take the time they need to share. You may also want to plan ahead so that your conversation happens in a comfortable, private place where the other person feels safe.

When the talking does happen, it's very helpful to be fully engaged. Listen deeply, encourage them through eye contact, open body language, and lots of empathetic responses. After all, the safer and trusting a person feels, the easier it will be for them to share with you.

Validation really helps

As a listener, it's very helpful to remember that you aren't available to judge someone's struggles, nor are you there to offer solutions. Through validation, you are letting them know that their problems are worth being concerned about, worth talking about, and that they deserve to be listened to. Here are some examples of validation statements:

I understand that you're upset, feeling anxious, sad, etc.

I get where you are coming from.

It sounds like you are feeling.....

Tell me what you really mean. I'm listening.

YOU CAN ASK IF THEY KNOW WHAT THEY NEED

When you're listening to someone, you can get distracted with thoughts of, "I don't know what to say." If you're unsure, tell the person, "If you know what you need, please let me know. Otherwise, I'm happy to listen and be here for you."

REMEMBER TO VALUE SILENCE WHEN APPROPRIATE

To avoid awkward silences, many people try to talk and fill in the gap. But in many cases, it's better to do the opposite. Silence can allow thoughts to "sink in" and help the person keep sharing their thoughts and struggles.

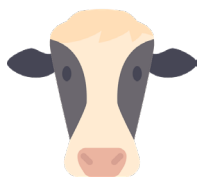

Don't forget to check in with yourself too

It's never easy for someone to open up and discuss their mental health struggles, but at the same time, it can be a challenge to listen to someone experiencing these things, too. In order to remain engaged and active as a listener, it's important to check in with your own mental health as well.

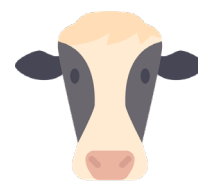

This can mean remembering to practise self-care after a conversation takes place – allotting the time for you to relax, decompress and process what you've just been hearing. However, this can also mean understanding your limits as a listener; if you feel that the person needs the kind of professional help that you cannot offer, it's perfectly reasonable to suggest this.

If you or someone you know needs a listening ear, reach out and call the Saskatchewan Farm Stress Line at 1-800-667-4442.

The Do More Agriculture Foundation is the national voice and champion for mental health in Canadian agriculture and is changing the culture of agriculture to one where all producers are encouraged, supported, and empowered to take care of their mental wellbeing. Producers are among the most vulnerable when it comes to mental health issues. By collaborating with the entire industry and those working to address the state of mental health in Agriculture, we can and will make a substantial impact.

Who Should I Call?

Who at the SaskMilk office should producers call?

Quota Exchange

The market-clearing price established for the April 2022 Quota Exchange was \$49,500.

The next Quota Exchange will be held on May 16, 2022. All offers to sell and bids to purchase quota through the Quota Exchange must be submitted by midnight, May 6, 2022. SaskMilk recommends that offers and bids be submitted well in advance of the deadline date to ensure adequate time for corrections, if necessary.

When making bids on the Quota Exchange, the price on offers to sell quota is the minimum price that the producer is prepared to accept for that quota. Only if the market-clearing price is equal to or greater than the producer's minimum price will that producer qualify for participation in the Exchange. Conversely, the price on offers to purchase quota is the maximum price that the producer is prepared to pay for that quota. Only if the market-clearing price is equal to or less than the producer's maximum price will that producer qualify for participation in the Exchange. The clearing price is set at the price where the smallest difference exists between the accumulated volume offered for sale and the accumulated volume bid to purchase. The results of the Quota Exchange are outlined in the following table.

APRIL 2022 QUOTA EXCHANGE RESULTS

Market Clearing Price per kilogram of butterfat	49,500.00
Daily Kilograms offered to Purchase	184.00
Kilograms offered to Sell	325.92
Kilograms sold	184.00

Mar-22	1,036,100	1,007,516	28,584	-244,994

In March, Saskatchewan had a monthly CDC allocation of **1,007,516 kilograms** of butterfat. Saskatchewan production was **28,584 kgs** of butterfat over and cumulatively over by **1,021,110 kgs** of butterfat. On a percentage basis, Saskatchewan is **8.34%** above our CDC allocation flexibility limits based on the Continuous Quota model. The -2.00% lower flexibility limit is in effect.

Healthy Calf, Healthy Future: Calf Trifecta Webinar

Are you eager to learn about the newest concepts in calf management? Are you interested in the opportunity to listen to world class experts in calf nutrition, health and welfare? Here's your chance! Register today to attend the University of Guelph's online webinar 'Healthy Calf, Healthy Future: Calf Trifecta'.

This webinar will be held Wednesday, April 20th, 2022, from 11:30 A.M. - 1:00 P.M. EST via Zoom, hosted by a fantastic group of graduate students in the Department of Animal Biosciences at the University of Guelph.

Experts include Dr. Michael Steele, Dr. David Renaud and Dr. Charlotte Winder who will discuss their current research and address practical on-farm strategies to improve dairy calf management.
