Dairy Farmers of Canada Annual General Meeting

The DFC AGM was held on July 13th & 14th in Ottawa. This meeting was held in a hybrid format, which allowed provincial representatives to attend in person, while all other interested individuals were able to view the meeting proceedings online.

This year's AGM focused on current DFC initiatives, including the commitment to environmental sustainability with DFC's goal of attaining net zero emissions on dairy farms by 2050. A Farmer Sustainability Advisory Group has been created to allow for producers from across the country to provide input and guidance in achieving this goal. DFC is also working with researchers, governments, and industry partners to help reduce the overall footprint of dairy.

Marketing is an important facet of Dairy Farmers of Canada for sharing the good work that Canadian dairy farmers are doing to produce a quality product with consumers in mind. DFC marketing initiatives from the past year were discussed, as well as the focus of connecting with Gen Z and millennials. In 2021/2022 DFC's campaigns generated 653 million impressions and reached 50.4 million people!

To read more about Dairy Farmers of Canada and the activities of the past year, you can read the DFC 2021-22 Annual Report [here](#).

Mental Health Spotlight

What's the Difference Between Stress and Anxiety?

By Lesley Kelly, Farmer and Co-Founder of the Do More Agriculture Foundation

On the surface, it can be hard to see any difference between stress and anxiety. After all, they're both the negative emotional experiences that can make you feel exhausted and irritable, reduce your concentration and leave you spending your nights sleepless and frantic, going through all the scenarios of how to increase the farm's profitability and the things that could happen to derail that plan. We often use the two words interchangeably, or may even think that they essentially mean the same thing but they have different origins. Figuring out whether you're dealing with anxiety or stress is one of the most important elements in figuring out a treatment plan and how to make yourself feel better.

There is a fine line between stress and anxiety — stress can trigger anxiety, and anxiety can be a symptom of extreme stress. And many symptoms — like muscle tension, rapid heartbeat, and insomnia — can impact people experiencing both problems. But ultimately, knowing which one you're really dealing with can help you feel better faster.

What is stress?

Generally, stress is a response to an external cause which creates feelings of frustration and nervousness, such as the tight timeline for taking the crop off at harvest before it snows or having an argument with a family member, and subsides once the situation has been resolved. Because stress is caused by external factors, tackling these head-on can help. If you're experiencing prolonged, chronic stress, there are many ways to manage and reduce your symptoms, including physical activity, breathing exercises, adequate sleep and taking time to connect with others.

What is anxiety?

Anxiety is a person's specific reaction to stress; its origin is internal. In other words, stress happens in your body, and anxiety happens in your mind and your body. Anxiety comes from a place of fear, unease and worry in situations that are not actually threatening. Unlike stress, anxiety persists even after a concern has passed. In more severe cases, anxiety can escalate into an anxiety disorder.

Am I Experiencing Stress or Anxiety?

Here are some signs that can help you distinguish between the two:

1. Stress is feeling nervous about an external situation and your symptoms go away when the situation has passed. While you can cause yourself stress through negative self-talk, or a negative attitude, it is usually triggered by something external. Anxiety, on the other hand, is more internal and how you react to stressors. If you remove those stressors and still feel overwhelmed and distressed, you are likely dealing with anxiety.

2. Anxiety is an excessive reaction to a given situation. Certain situations are stressful, and would be for anyone, such as the loss(es) of animals or a crop. Anxiety is more of an excessive reaction. If the worry and distress you feel in a given situation is unusual, excessive, or goes well beyond the reactions of other people, it may be anxiety rather than stress.

3. Being unable to complete day to day tasks or work are signs of anxiety. Most stressful situations are difficult to get through but are ultimately manageable. Anxiety disorders can leave you completely unable to manage normal, everyday tasks. If you are distressed to the point of being unable to work or carry out tasks, and/or having a panic attack, an anxiety disorder may be the underlying issue.

Anxiety may create “what ifs” over and over again in your mind. Anxiety causes feelings of dread and fear of things that haven’t happened or don’t exist. On the other hand, stress is a response to something happening or a pressure you feel. For example, with an anxiety disorder you may feel a general sense of apprehension, dread, and worry, even when there is nothing coming up that should cause you to be concerned.

Specific symptoms may be an indication of an anxiety disorder. If you have certain, specific symptoms, these may indicate you have an anxiety disorder or at least that your issue is beyond simple, everyday stress. For example, panic attacks are a characteristic of panic disorder, a type of anxiety disorder. High levels of stress and anxiety in social situations may indicate a social anxiety disorder.

No matter which issue you're struggling with, you don't have to deal with it alone. Talk to someone you trust about what you're going through, and know that no matter what you are going through, you can start feeling better.

These are guidelines for further awareness about mental health and should not be used as a diagnosis or treatment plan. If you need assistance, please contact your doctor, a mental health professional or visit the [Do More Ag resources page](#).

The Do More Agriculture Foundation is the national voice and champion for mental health in Canadian agriculture and is changing the culture of agriculture to one where all producers are encouraged, supported, and empowered to take care of their mental wellbeing. Producers are among the most vulnerable when it comes to mental health issues. By collaborating with the entire industry and those working to address the state of mental health in Agriculture, we can and will make a substantial impact.

Quota Exchange

The market-clearing price established for the July 2022 Quota Exchange was \$43,500.00.

The next Quota Exchange will be held on August 15, 2022. All offers to sell and bids to purchase quota through the Quota Exchange must be submitted by midnight, August 6, 2022. SaskMilk recommends that offers and bids be submitted well in advance of the deadline date to ensure adequate time for corrections, if necessary.

When making bids on the Quota Exchange, the price on offers to sell quota is the minimum price that the producer is prepared to accept for that quota. Only if the market-clearing price is equal to or greater than the producer's minimum price will that producer qualify for participation in the Exchange. Conversely, the price on offers to purchase quota is the maximum price that the producer is prepared to pay for that quota. Only if the market-clearing price is equal to or less than the producer's maximum price will that producer qualify for participation in the Exchange. The clearing price is set at the price where the smallest difference exists between the accumulated volume offered for sale and the accumulated volume bid to purchase. The results of the Quota Exchange are outlined in the following table.

JULY 2022 QUOTA EXCHANGE RESULTS

| | |
|---|-------------|
| Market Clearing Price per kilogram of butterfat | \$43,500.00 |
| Daily Kilograms offered to Purchase | 96.10 |

DFC Update

Latest DFC ad campaign a 'rallying cry' for sustainable agriculture

Dairy Farmers of Canada (DFC) has launched a powerful new advertising campaign promoting its ambitious target to reach net-zero greenhouse gas emissions (GHG) from dairy farms by 2050. DFC's "I'm In" campaign builds upon the long-standing commitment of dairy farmers as stewards of the land and demonstrates how innovation is taking place on farms to achieve the sustainability goal. Throughout the campaign, real farmers proudly demonstrate their actions to protect the environment by declaring, "I'm in!" for DFC's Net Zero 2050 goal.

"I'm In" shines a light on sustainable strategies being undertaken by Canadian dairy farmers, through the sector's robust quality assurance program, proAction®, as well as other initiatives and innovations including a focus on soil health and water retention, plastics recycling, renewable energy and enhanced biodiversity. Highlighting these efforts are real farmers – who, for decades, have been making improvements that are beneficial for the farm and the environment – telling their own stories as they work year-round to produce high-quality, safe and nutritious milk.

Canadians can continue to put their trust in dairy farmers who share their experience with real-life projects such as sustainable cropping practices (regenerative agriculture), wetland restoration, tree planting, carbon sequestration and more.

The campaign will run from July 1st to August 12th, 2022, on televised and digital platforms, with strong influencer participation geared towards millennials and Gen-Zs, many of whom place environmentalism top-of-mind when making purchasing decisions.

To view the campaign, please visit: <https://dairyfarmersofcanada.ca/en/net-zero-2050>.

Lactanet Canada is a producer owned organization, providing innovative dairy herd management and genetic services to more than 8,000 dairy farm customers and professional advisors throughout the country.

Dairy Farm Validator - Saskatchewan

We are currently accepting applications for a permanent **Part Time** Validator (1-2 days per week). Ideally, you will be located in the high dairy farm density areas of the province.

The Validator's primary responsibility is to conduct dairy farm audits by reviewing and documenting compliance with the national proAction program requirements. You will be working directly on-farm as well as from your home office. Candidates who appreciate the farm environment, rural road travel and interacting with dairy producers will fit well in this position.

In this role, you will:

- Visit dairy farms to review and document on farm processes, protocols and record keeping.
- Assist and provide additional information to producers about the interpretation and application of the proAction program and its requirements.
- Independently arrange your administrative, travel and scheduling tasks.
- Actively participate and successfully complete the proAction validator training provided.

Position Requirements:

- Degree/Diploma in agriculture and minimum 2 years dairy production experience or minimum 5 years' experience in dairy cattle production on farm.
- Strong organizational skills and ability to work independently.
- Strong communication and interpersonal skills.
- Proficiency with electronic data capture.
- Must reside in, or in proximity of, the territory area, have a valid driver's license, dependable transportation and home office high-speed internet.

Apply:

If you meet the qualifications for this position and reside in the location of this vacancy, please send your resume with the subject line "**Validator - Saskatchewan**" to careers@lactanet.ca.

Lactanet is committed to an inclusive, equitable and accessible workplace where people are valued, respected and supported. Accommodation for applicants with disabilities is available on request. We thank all applicants for their interest and will contact those who are selected for an interview. NO PHONE CALLS OR AGENCIES PLEASE.

Classified Ad Service

SaskMilk offers a free classifieds service as part of its newsletter. Anyone wishing to place an ad is welcome to contact the SaskMilk office at (306) 949-6999 or info@saskmilk.ca. All negotiations will be independent of SaskMilk. Please note that ads will be posted in two issues and will then be removed unless SaskMilk is notified otherwise.

Operating Dairy farm with 44kgs. quota and cows 20 minutes northwest of Saskatoon. House and barn built in 2017 and is on 160 acres. The house is just over 1500 sq.ft. The barn is 70'x170' straw pack with 1 Lely A4 robot. Some equipment included. Additional 240 acres available. For more info call 306-260-8416

Reminder!

The deadline date for Quota Transfer, Quota Exchange, and 10% Transfer Limit Exemptions is the 6th of each month

Your Quota Transfer, and 10% Exemption Applications must be received on or before the 6th of the month in order to be effective the 1st of the following month

Quota Exchange forms must be received in the SaskMilk office on or before the 6th of the month for that month's Exchange.
