## Changes to Milk Quality Progressive Penalties

### WMP Harmonized Policy Coming May 1st

A Western Milk Pool (WMP) harmonized version of the Progressive Penalty Policy (PPP) will be implemented across Manitoba, Saskatchewan, Alberta, and British Columbia. This new PPP will begin to roll out across the WMP in early 2023 in Manitoba and Alberta. Due to legislative complexities, British Columbia will follow several months later.

In Saskatchewan, the policy will take effect May 1, 2023, as the changes will be placed into Board Order. This harmonized policy includes changing the penalty amount, reducing the contravention period, and adding potential production licence suspension.

Remember to monitor your quality frequently - the Sask-Milk Portal provides two places to find information under the Quality tab:

- Special Quality; and
- Progressive Penalty Results

For more details, please see the Notice emailed to all farms on January 5, 2023, or see the Notice in your SaskMilk Portal

If you have any questions, please contact the SaskMilk office

A Productive Cow

## proAction<sup>®</sup> Validation: Lactanet and WMP Transition

*Morgan Hobin, Alberta Milk proAction Coordinator*

The Western Milk Pool (WMP) partners responsible for proAction (BC Dairy Association, Alberta Milk, SaskMilk and Dairy Farmers of Manitoba) transitioned proAction validation and validator services to Lactanet back on October 1, 2022. The move to engage Lactanet as a third-party organization is expected to provide greater consistency of validation, rigour and assurance across all 1,400 dairy farms in western Canada. Since proAction is a Dairy Farmers of Canada national program, all proAction validators will continue to be trained and certified by them.

Lactanet already has experience in providing these validation services in Ontario. With Lactanet now taking on this role in the west, it will allow the WMP provincial producer organizations time to focus on providing assistance and education to dairy producers regarding best practices and advancements in dairy farming. Additionally, the WMP partners collectively have a greater capacity to recommend policy improvements to the proAction program and engage actively with key stakeholders, including dairy processors.

With four months of transition behind us, we continue to work together to streamline provincial processes and procedures, and to manage identified gaps. Communication amongst the WMP provincial partners and Lactanet staff occurs regularly, ensuring that services at the farm level continue with the fewest disruptions possible. In addition, we are pleased to note that all validators contracted by the WMP partners prior to October 1 have made the transition over to Lactanet and continue to validate in their respective provinces.

Through this WMP proAction validation services transition, a key area that has been highlighted is the opportunity to streamline provincial proAction procedures. There are several differences in how the individual provinces manage their respective administrative processes, including compliance policies. As the WMP transformation continues forward, these areas of the proAction program are prime examples of where the provinces will work together to harmonize all current policies, procedures, and programs to achieve a single WMP approach and delivery of proAction.

# Mental Health Spotlight

## 5 New Year's Resolutions For Better Mental

By Lesley Kelly, Farmer and Co-Founder of the Do More Agriculture Foundation

Do you have a New Year's resolution for the farm? Some of the resolutions could include managing costs better, focusing on a succession plan, and improving production practices. Another resolution to consider is focusing on your mental health, because taking care of you and your mental health is also taking care of the farm.

After another unprecedented year, many are looking to protect and make their mental health a priority. The past two years have been full of adjustments. And while we're looking forward to a brighter 2022, continuing COVID-19-related worries can make traditional New Year's resolutions stressful to stick to. Instead, make 2022 the year of mental health for you and your farm. This gentler approach can give you the space and time to think about what you want to change to feel better and what you realistically can do to achieve that change. By taking smaller, more achievable steps towards your goals, there is a greater chance that you will keep them.

This applies to all kinds of resolutions, including mental health. You can help manage your mental health symptoms by taking small steps every day. Of course, there's no one-size-fits-all approach to mental health. But these simple, low-stress resolutions can help boost your mental wellness for a happier New Year.

1. **Make time for self-care:** Self-care is something that can be done in as little as 10 minutes a day with no cost at all. And it can help reduce stress and positively impact your mental health and well-being. Brainstorm a list of self-care activities that make you happy and schedule them as part of your daily routine. This could be structured therapy sessions or daily exercise, a stretch in the tractor or simply an outdoor walk or time with friends and loved ones.
2. **Identifying and fostering healthy relationships:** Unhealthy relationships can quickly become a stressor or mental illness trigger. For this reason, it's important to pursue relationships with those who encourage healthy habits and provide emotional support. Depending on your circumstances, consider:
  - Reaching out to old friends you have lost contact with
  - Making regular plans with family members
  - Joining a social organization that reflects your interests or values
  - Volunteering with a non-profit organization you support
  - Creating or joining a peer group - You might find meaningful relationships and emotional support from other farmers, neighbors and those in and around your community or area.
3. **Improve your sleep:** With the changes of seasons in farming comes changes to our sleeping patterns as well. But there is so much value in having a bedtime routine and getting good sleep. According to Mental Health Canada, a chronic lack of sleep can lead to mental health issues like depression. If you're experiencing bouts of depression or mood swings, maintaining a regular sleeping schedule that gives you 7-8 hours of sleep each night could dramatically improve your wellbeing.
4. **Reduce time spent on social media:** Studies have shown that an excessive use of social media can lead to less moment-to-moment happiness and less life satisfaction. While these platforms help keep us connected to family and friends, like all things, social media is only good in moderation. This year, try limiting your daily use or taking regular breaks from your apps so you can focus more on your wellbeing.
5. **Learn more about mental health:** One of the most important resolutions for your mental health is to understand it and to know when to seek help. There are online resources and workshops available that provide information about mental health, as well as speaking to a medical and/or mental health professional.

Also, please be kind to yourself. Change can be hard and often takes time. Allow yourself to have feelings and forgive yourself for mistakes. You are here and doing your best, and that's what counts. So make 2022 the year that will have a long-lasting impact on your mental health and happiness.

For more resources visit [domore.ag/crisis-contacts](https://domore.ag/crisis-contacts).

***The Do More Agriculture Foundation is the national voice and champion for mental health in Canadian agriculture and is changing the culture of agriculture to one where all producers are encouraged, supported, and empowered to take care of their mental wellbeing. Producers are among the most vulnerable when it comes to mental health issues. By collaborating with the entire industry and those working to address the state of mental health in agriculture, we can and will make a substantial impact.***

# Western Canadian Dairy Seminar

**Early Bird Deadline to Register for the 2023 WCDS is Feb. 10!**

Join us in Red Deer, March 7 to 10, 2023 at the Red Deer Resort & Casino for the 40th anniversary celebration of the WCDS 'Building on 40 Years of Dairy Extension'. Don't miss out on our incredible line up of expert speakers, producer panel (including virtual farm tours) and 75 booth trade show. [Download the brochure](#) for more information about the agenda, our speaker line up and our sponsors or visit [www.wcds.ca](http://www.wcds.ca).

Register by February 10, 2023 to receive our early bird pricing (\$295 for a full registration) and to be entered to win 1 of 8 WCDS touques. You can register online or download our registration form at <https://wcds.ualberta.ca/registration/>.

**\*Make the most out of your WCDS with our sponsor-led workshops\***

**Western Canadian Forage Quality Workshop** – hosted by Cumberland Valley Analytical Services (CVAS) and Lallemand Animal Nutrition

Join CVAS Forage Specialist Ralph Ward on evaluating a forage analysis report, followed by a panel discussion led by Lallemand's Dr. Andy Skidmore on maximizing return on your feed testing investment. Also, get the inside scoop on the **2024 Western Canadian Forage Quality Competition**, including discounted rates for forage analysis and prizes for the highest quality samples. Finally, cap off the workshop with networking and a brewery demo and beer tasting with the 'Yeast Whisperer' Shea Comfort!

**When:** Tuesday March 7, 3:00 - 5:00 PM

**Where:** Red Deer Resort & Casino

**Cost:** FREE

For more information or to register, visit the [event page here](#)

**Enhancing Emergency Management in Western Canada's Dairy Sector** – Presented in partnership by Alberta Farm Animal Care and the Animal Health Emergency Management Project

Students and industry experts alike are invited to join us for a free workshop to learn more about emergency management in Canada's dairy industry as it relates to both disease and adverse events. Ample opportunity will be provided for dialogue and relationship building between industry experts and students – connecting established professionals with incoming stakeholders. The program includes lunch, a dairy biosecurity emergency scenario facilitated by AHEM and networking events.

**When:** Tuesday March 7, 12:00 - 4:00 PM

**Where:** Red Deer Resort & Casino

**Cost:** FREE

**\*REGISTRATION DETAILS COMING SOON.** For more information email [info@afac.ab.ca](mailto:info@afac.ab.ca)

See you in Red Deer!!

## Quota Exchange

**The market-clearing price established for the January 2023 Quota Exchange was \$39,050.00.**

The next Quota Exchange will be held on February 15, 2023. All offers to sell and bids to purchase quota through the Quota Exchange must be submitted by midnight, February 6, 2023. SaskMilk recommends that offers and bids be submitted well in advance of the deadline date to ensure adequate time for corrections, if necessary.

When making bids on the Quota Exchange, the price on offers to sell quota is the minimum price that the producer is prepared to accept for that quota. Only if the market-clearing price is equal to or greater than the producer's minimum price will that producer qualify for participation in the Exchange. Conversely, the price on offers to purchase quota is the maximum price that the producer is prepared to pay for that quota. Only if the market-clearing price is equal to or less than the producer's maximum price will that producer qualify for participation in the Exchange. The clearing price is set at the price where the smallest difference exists between the accumulated volume offered for sale and the accumulated volume bid to purchase. The results of the Quota Exchange are outlined in the following table.

JANUARY 2023 QUOTA EXCHANGE RESULTS	
Market Clearing Price per kilogram of butterfat	\$39,050.00

## DFC Update

### proAction's Animal Care framework consistent with national standards, says NFACC

An independent review by a credible third-party organization has reaffirmed that the proAction Animal Care module developed by Dairy Farmers of Canada (DFC) and implemented on Canadian dairy farms is consistent with national animal care standards.

In a letter to DFC this November, the National Farm Animal Care Council confirmed it has independently reviewed the content of the DFC's proAction® program and found it to meet all requirements of Canada's Animal Care Assessment Framework. This national framework was developed by consensus among multiple stakeholders and sets a credible process for developing animal care assessment programs.

"This declaration from NFACC serves as further recognition that the best management practices followed by Canadian dairy farmers under the proAction program are consistent with the highest standards of animal care," says DFC President Pierre Lampron. "Under proAction, Canadian dairy farmers produce high-quality, nutritious milk in accordance with some of the world's most stringent standards. proAction builds on robust federal and provincial regulations, instilling confidence that every drop of Canadian milk was produced with care."

The Animal Care module of proAction is based on the Code of Practice for the Care and Handling of Dairy Cattle, which is a science-based, nationally developed guideline containing both requirements and best practices for dairy cattle care and handling.

DFC recently issued its 2022 Progress Report on proAction, highlighting progress made by the dairy sector over the past year in the program's six priority areas: milk quality, food safety, animal care, livestock traceability, biosecurity and the environment. It also draws links between proAction and DFC's Net-Zero Strategy.

To view the 2022 proAction Progress Report, please visit <https://dairyfarmersofcanada.ca/en/proaction-progress-report>

## Classified Ad Service

SaskMilk offers a free classifieds service as part of its newsletter. Anyone wishing to place an ad is welcome to contact the SaskMilk office at (306) 949-6999 or info@saskmilk.ca. All negotiations will be independent of SaskMilk. Please note that ads will be posted in two issues and will then be removed unless SaskMilk is notified otherwise.

### Reminder!

**The deadline date for Quota Transfer, Quota Exchange, and 10% Transfer Limit Exemptions is the 6th of each month**

Your Quota Transfer, and 10% Exemption Applications must be received on or before the 6th of the month in order to be effective the 1st of the following month

Quota Exchange forms must be received in the SaskMilk office on or before the 6th of the month for that month's Exchange.
