

SaskMilk is very pleased to announce that Teresa Florizone has accepted and started in the role of Executive Director for Saskatchewan. In this role, she will be working closely with the SaskMilk Board of Directors and representing the province within the Western Milk Pool. Teresa will be engaging with the SaskMilk team as she gets up to speed on the SaskMilk organization and the Western Milk Pool.

As a Chartered Professional Accountant, Teresa has a strong financial and business background. Having held roles with the City of Regina and SaskBuilds Corporation, she is familiar working within regulatory environments and building strong relationships with government officials. Most recently Teresa has been working as the CFO and VP of Corporate Services for the Saskatchewan Public Safety Agency where she led the work to set up the new agency and collaboratively integrated 4 ministry partners effectively into the agency.

Teresa is particularly excited about this role with SaskMilk as she has a passion for effective governance and while growing up she spent time on a farm, including some experience with cattle.

Please join us in welcoming Teresa to SaskMilk!
